Alex Willis - Willis Design Group P/L
James Hardie Building Pods

We loved this concept, and the designer's passion and knowledge in this area. The use of pods was innovative and beyond the scope of the brief. The specification of James Hardie products was well thought through and complimentary to the design. We also loved that the designer considered the sustainability requirements of the brief from a "zero waste" perspective. Love your work Alex Willis from ACW Design. 'Judges Comments
